CONCENTRIC CIRCLE

FIG.11H

FIG. 11A: A square is inscribed within a circle. The square is centered, and its corners touch the circle's circumference.

FIG. 11B: A square is inscribed within a circle. The square is centered, and its corners are clipped by the circle's circumference, resulting in rounded corners.

FIG. 11C: A square is inscribed within a circle. The square is offset from the center, meaning its sides are parallel to the circle's horizontal and vertical axes but not centered on them.

FIG. 11D: Two concentric circles are shown. The inner circle is offset from the center of the outer circle, creating an annular shape that is not perfectly circular.

FIG. 11E: A cross is inscribed within a circle. The cross is centered, and its arms extend to the circle's circumference.

FIG. 11F: A cross is inscribed within a circle. The cross is centered, and its corners are rounded or scalloped, following the curve of the circle's circumference.

FIG. 11G: A cross is inscribed within a circle. The cross is centered, and its arms have a stepped or notched appearance, with small rectangular indentations at the corners.

FIG. 11H: Two concentric circles are shown. The inner circle is centered within the outer circle.
